

OPERATIONS

Yummy Future started as one box on a trailer in March 2019, after being developed at the Advanced Digital Projects Lab at the University of Illinois Urbana-Champaign.

CURRENT PLANS

Yummy Future machines are currently operating in Palo Alto, CA, and Champaign, IL. Plans are underway to open next in New York, Los Angeles, Chicago, Seattle, and Boston.

Plans for our next cafes are based on non-binding letters of interest

Invest in a yummy future.

Yummy Future is expanding rapidly. Be a part of that growth.

YUMMY FUTURE

PROBLEM

The restaurant industry lags furthest behind in robot automation rates.

Factories have spent the last fifty years engineering error out of their work. Food service has barely adopted automation at all — the industry still runs on hands.

INDUSTRIAL ROBOTS PER 10,000 WORKERS

South Korea	1,220
Germany	449
Japan	446
China	166
Global average	132
US food manufacturing	89

Source: IFR World Robotics 2025 · US food & beverage manufacturing: IFR via ING, 2020 data

Running on hands costs the crew and the owner.

130%

ANNUAL TURNOVER AMONG FRONT-LINE FOOD-SERVICE ROLES

Source: Black Box Intelligence

30–35%

OF RESTAURANT REVENUE GOES TO LABOR

Source: Bureau of Labor Statistics

High turnover. Tired crews. Falling service.

The customer never gets the same cup twice.

YUMMY FUTURE

PRODUCT

We have built a production workhorse that runs fast and produces highly consistent results.

MAX is a complete automated drink platform, not just a robot arm. Hardware, software, payments, inventory, and supply chain all come together in one system. Everything an operator needs to run a drink business, with no robotics expertise required.

The system ships with the ability to pour coffee, matcha, and cocktails, with the ability to add tea immediately available. More options coming all the time.
